Ideation Phase

Empathize & Discover

Empathy Map Canvas: An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes. It is a useful tool to help teams better understand their users. Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Why use an Empathy Map?

- Captures who the user is and what they care about most.
- Aligns cross-functional team members around a single user perspective.
- Highlights pain points, underlying motivations, and emotional drivers.
- Guiding design decisions for the EV Market Performance & Insights dashboard.

EMILY JOHNSON
Market Strategy Director

SAYS
- Which vehicle categories drive the most annual sales?
- Who are the top manufacturers and how do customers rate them?
- I need one executive view to plan our product portfolio.

THINKS
- Which high-growth segments should we invest in next?
- Which battery tech (LFP, NMC, Solid-State) gives the best range and value?
- Scattered reports make it hard to trust the full market picture.

DOES
- Tracks sales, price, range and ratings across categories and regions.
- Benchmarks manufacturers and battery technology adoption.
- Presents market insights to leadership to guide portfolio decisions.

FEELS
- Pressured to make high-stakes strategy calls quickly.
- Frustrated by fragmented data that is hard to compare.
- Confident when insights are clear, visual and interactive.

DAVID CHEN
Business Intelligence Manager

SAYS
- Which manufacturers hold the largest market share?
- What do customer ratings say about each brand?
- My clients need data-backed advice before entering the EV market.

THINKS
- Where is production concentrated, and which countries lead?
- Which battery technologies dominate the market today?
- Manual comparison across datasets is slow and can miss key insights.

DOES
- Monitors manufacturer sales, market share and customer ratings.
- Compares production by country and battery technology mix.
- Turns findings into advice on product positioning and market entry.

FEELS
- Under pressure to give clients accurate, defensible advice.
- Frustrated by data sources that are not connected.
- Confident when competitive advantages are clear and provable.

DR. SARAH WILLIAMS

Sustainable Mobility Research Analyst

SAYS

- How do battery technologies compare on range and lifespan?
- Is driving range improving across vehicle categories?
- Policymakers need evidence, not assumptions.

THINKS

- Which technology trends will speed up EV adoption?
- How do manufacturing capacity and customer satisfaction shape growth?
- Are the CO2 savings real across regions and drivetrains?

DOES

- Studies battery performance, range and charging efficiency.
- Analyses global manufacturing distribution and regional CO2 saved.
- Shares evidence with governments and research institutions.

FEELS

- Motivated by the goal of cutting carbon emissions.
- Concerned when metrics are scattered and hard to compare.
- Confident when the evidence is clear enough to guide policy.
