Project Design Phase-I
Problem – Solution Fit Template

Date	28-10-2026
Team ID	**EN25CS3011021**
Project Name	EV Market Performance and Insights
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why.

Purpose:

• Solve complex problems in a way that fits the state of your customers.

• Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.

• Sharpen your communication and marketing strategy with the right triggers and messaging.

• Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.

• Understand the existing situation in order to improve it for your target group.

Template:

Problem-Solution fit canvas 2.0

Give EV decision-makers one interactive view of market performance, manufacturers, battery technology and CO2 impact, so they can make faster, data-driven decisions.

Define CS, fit into CC

1. CUSTOMER SEGMENT(S) — CS

Who is your customer?
i.e. working parents of 0-5 y.o. kids

- Market Strategy Directors at EV manufacturers
- Business Intelligence managers at automotive consulting firms
- Sustainable mobility researchers and policy analysts

6. CUSTOMER CONSTRAINTS — CC

What constraints prevent your customers from taking action or limit their choices of solutions? i.e. spending power, budget, no cash, network connection, available devices.

- Large, scattered datasets (sales, battery, range, ratings) that are hard to combine
- Limited time and analyst capacity for manual analysis
- Need no-code, easy-to-read views with simple filters
- Must rely on common tools such as Excel and Tableau

5. AVAILABLE SOLUTIONS — AS

Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? i.e. pen and paper is an alternative to digital notetaking

- Excel sheets and static reports: familiar, but manual, quickly outdated and not interactive
- Paid industry / consulting reports: broad coverage, but costly and not customizable
- Separate manufacturer or government statistics: reliable, but fragmented and hard to compare

Explore AS, differentiate

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS — J&P

Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.

- Find which vehicle categories drive annual sales and which segments are growing
- Compare manufacturers on sales, customer reviews and retained value
- Evaluate battery technologies (LFP, NMC, NCA, Sodium-Ion, Solid-State), driving range and charging efficiency
- Understand production by country and CO2 saved by region

9. PROBLEM ROOT CAUSE — RC

What is the real reason that this problem exists?
What is the back story behind the need to do this job?
i.e. customers have to do it because of the change in regulations.

- EV market data is large, fast-growing and stored in many disconnected sources
- New vehicle categories and battery types make like-for-like comparison hard
- No single interactive view links sales, technology, customer ratings and sustainability
- Decisions end up resting on partial or outdated insight

7. BEHAVIOUR — BE

What does your customer do to address the problem and get the job done?
i.e. directly related: find the right solar panel installer, calculate usage and benefits; indirectly associated: customers spend free time on volunteering work (i.e. Greenpeace)

- Directly: build manual Excel reports and pivot tables; compare figures across files
- Search market reports and manufacturer data for benchmarks
- Indirectly: follow EV news, incentives and battery trends to judge direction
- Present findings to leadership, clients and policymakers

Focus on J&P, tap into BE, understand RC

Identify strong TR & EM

3. TRIGGERS — TR

What triggers customers to act? i.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.

- A market-entry or product-portfolio decision is due
- New EV models or battery technology launch; leadership or clients ask for evidence

4. EMOTIONS: BEFORE / AFTER — EM

How do customers feel when they face a problem or a job and afterwards?
i.e. lost, insecure > confident, in control - use it in your communication strategy & design.

- Before: overwhelmed, uncertain, frustrated by scattered data
- After: confident, in control and ready to present clear evidence

10. YOUR SOLUTION — SL

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.
If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.

- Interactive Tableau dashboard suite: EV Market Performance and Insights.
- Dashboard 1: KPI cards (EV sales 1.55B, avg price $64,921, avg range 324.54 km, CO2 saved 738K tons/yr), production by country, top manufacturers, driving range, retained value.
- Dashboard 2: sales trend, battery tech, charging vs efficiency, regional CO2 saved.
- A shared category legend links all charts.

8. CHANNELS of BEHAVIOUR — CH

8.1 ONLINE
What kind of actions do customers take online? Extract online channels from #7

- Download EV datasets (CSV / Excel) and read online market reports; explore interactive dashboards and filters

8.2 OFFLINE
What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

- Review reports in leadership and client meetings; discuss insights with colleagues and policymakers; use printed dashboard summaries

Extract online & offline CH of BE
